

KORE Wireless Business Internet

Transformative connectivity for your connected business

Always-on internet is more important now than ever. With more and more business-critical systems from point of sale and food safety sensors to employee training, connectivity is not an option and downtime can bring your business to a halt.

This is where KORE comes in. We will make sure your internet is never down and has the performance you need to run your business as you see fit.

KORE Wireless Business Internet uses 5G and LTE connectivity supporting your businesses wherever they are located. Add to that: enterprise grade hardware and the managed services you need, including end-to-end support, staging and kitting, and optional installation services.

The solution is simple and easy to deploy, reducing the need for any technical expertise to get your business connected. Take advantage of more consistent, enterprise-grade connectivity today.

KORE Wireless Business Internet Includes:

- Fixed cost with no overages
- All major carriers
- Monthly pricing for hardware

KORE Wireless Business Internet Use Cases

Primary internet connection. KORE Wireless Business Internet provides an enterprise grade, reliable, cost-effective, and rapidly deployable connection to your retail and branch offices.

New technologies. Support new technologies such as video analytics that require more bandwidth; and mobile payments, loyalty programs, work safety technologies where downtime is not an option with KORE Wireless Business Internet.

Network augmentation. Establish an active-active network with business-essential applications like timekeeping and point of sale utilising the wireless network, and high-usage applications like public Wi-Fi and streaming services on a wireline connection.

"Always-on" failover. KORE Wireless Business Internet offers a highly reliable and diverse internet option that can serve day-to-day data needs and function as a secondary connection if the primary connection fails with KORE Wireless Business Internet.

Why KORE?

KORE is a pioneering leader and trusted advisor that helps deliver transformative business performance from 5G and LTE solutions. We help customer organizations of all sizes navigate the complexities of cellular and improve execution, so

they can focus on operational and business results. Our 5G and LTE expertise and experience, global reach, independence, and deployment agility accelerate and materially improve our customers' return on their cellular investments.
